EDUCATION

DIT – Diploma of Information Technology

PBT Lahore (TEVTA)
2021 – 2022

BBIT – Business & IT

Virtual University of Pakistan
2026 – Present

SPECIALISATIONS

- Front-End Architecture (MVC)
- Offline-first / IndexedDB Apps
- ERP & POS System Interfaces
- Responsive UI / UX Design
- REST API Integration

PROFILE

Experienced Front-End Developer with hands-on expertise in React, Angular, and Vue.js + TypeScript across MVC and component-based architectures. Skilled in state management (Redux, Context API, Pinia), offline-first data handling with IndexedDB, and building enterprise-grade ERP, POS, and e-commerce interfaces. Passionate about delivering efficient, maintainable, and visually appealing solutions entirely on the frontend.

WORK EXPERIENCE

Front-End Web Developer (Remote)

~8 Months

Lynx ERP Solution – Remote

- ▶ Worked on the ERP system using **Vue.js + TypeScript** within an **MVC architecture**, with all business logic and state managed entirely on the frontend.
- ▶ Built **POS system** interfaces using **IndexedDB** for complete frontend-side data management, enabling fast and offline-capable transactions.
- ▶ Developed multiple **brand store websites** with IndexedDB-powered frontend storage for cart, session, and product data.
- ▶ Used **Pinia** for reactive state management across Vue.js components in the ERP and store projects.
- ▶ Collaborated remotely with the team to deliver features on schedule within sprint cycles.

Front-End Web Developer

2024 – Present

Kodware Company

- ▶ Building React applications with **Redux** and Context API for scalable state management.
- ▶ Implementing reusable components and performance optimisation for smooth user experience.
- ▶ Developing scalable, maintainable Angular applications across multiple in-house projects.
- ▶ Integrating REST APIs and enhancing UI/UX for seamless web application functionality.

Computer Operator

2022 – 6 Months

Stationary Shop

- ▶ Operated office equipment and designed CVs, letter pads, and professional documents.

RELEVANT PROJECTS

1. ScriBee App

Lynx ERP Solution

Healthcare platform for real-time patient-doctor interaction, online consultations, and appointment management. Built with **React + Redux** for predictable, scalable frontend state across complex medical documentation workflows.

2. Learning Management System

Kodware Company

Comprehensive education platform with Admin, Trainer, and Student roles — managing courses, tracking progress, and enabling efficient knowledge delivery.

3. Advertisement App

Ad platform where users log in, post ads, and browse listings for jobs, selling, and purchasing — designed for easy ad management and seamless user experience.
